VALUES to the WATER

JASH AQUA

ABOUT

US

Over twenty years of innovative expertise and services, in the field of water features and irrigation, have made us understand and deliver to our clients better. We welcome the ideas from our clients to customize the products to their specific needs.

In the indoor and outdoor developments, water plays a vital role from energizing the surrounding to enhancing the livelihood. We try to understand the mood you expect us to create with water as one of the basic elements. We know how to incorporate this vitalizing element. Isn't our environment our extension? Wherever we look for peace and tranquility, the gushing sound of water uplifts our mind beyond the hassle and tiredness of the day. And of course, making a beautiful background to our select music.

We understand your needs better. A water feature has to give soothing and harmonizing appeal even when not in operation to suit to your mind. It should behave like an sculpture and not as an assembled combination of hardware. We serve our clients through our innovative expertise, knowledge and never ending quest for delivering the best of our capabilities.

With broad spectrum of our clientages, we can ensure our prospects to serve up to their expectations. We are regularly training and updating ourselves to serve you better. We develop the customized new products to suit to your needs as the case may be.

We are always looking for opportunity to serve you our best. Please call us, mail us and let us get associated with your projects.

Musical Dancing Fountains

In Musical Fountains, the dancing water jets, video projection onto the water screen and laser shows are used to celebrate the mood & melody of the music and scripts. The lightings & water jets are synchronized in a mesmerizing manner to create a theatrical presentation.

We not only have our own technology but also have the off-shore collaborations for the effective creations matching the world standards.

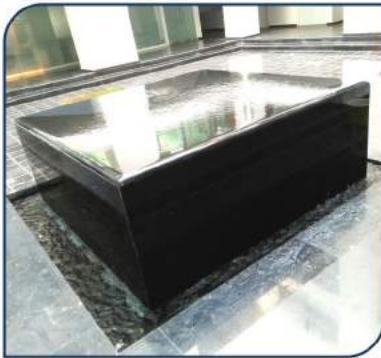

We have capability to design and built musical dancing fountains of all the sizes to respect your needs. Please let us know your requirements.

Fountains with Design & Mood

The holistic architectural design balances the elements of nature and result into creation of historical benchmarks worldwide. Water enjoys itself in form of architectural water features and we design and create the hydraulics & lighting for water with due honor to the architectural language, design and mood. Thus, the mood of the fountains takes its shape in

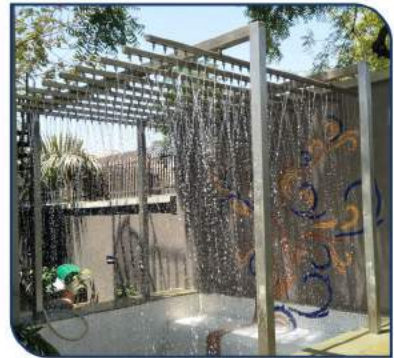

our creativity. Try us, we are confident to be up to your expectations.

Fountains with Place & Look

The surrounding environment interacts and touches the water features. It defines the place and shapes the look of the water feature fountains. The delicacy of the language expressed in the fountains use to induce the interaction and respects the mood of the surrounding to be created.

Water feature with Materials of Theme

The materials matter to the extent of expressions. Different types & textures of materials are used to create the theme to be expressed.

Irrigation Systems

To maintain the soft landscape ever-green at the golf course, gardens or at the sport fields; the uniform distribution of water on daily basis is inevitable so as to maintain the landscape at the field capacity. To ensure this, suitable landscape irrigation system is designed with due considerations of daily water requirement. This significantly reduces the total water requirement for irrigation and it also provides ease of operation and maintenance. We express ourselves as one the leading landscape irrigation designer and system provider in India to serve you the best.
